VERSATILE PULSED LASER MODULE

KATANA

+

SWISS MADE

EXTERNAL TRIGGERING AT ANY FREQUENCY

Katana is a versatile, **sub-nanosecond** laser system designed for all industrial applications that require maintenance-free operation, continuous tuning of the repetition rate and low cost of ownership. It can provide pulses from **30 ps up to 10 ns** in pulse duration. The Katana laser can be operated from pulse-on-demand up to **100 MHz**, and it can also easily be triggered from an external source (master or slave mode). A single-box multi-wavelength version is available which, combined with the use of the Katana HP as a depletion laser, can provide a complete source for super-resolution fluorescence microscopy.

OPTIONS:

- + Single-box multi-wavelength emission
- + Burst mode
- + Isolator /collimator output
- + Second harmonic generation
- + Fiber output (PM or SM)
- + More options on request

MAIN APPLICATIONS:

- + Multi-wavelength excitation for fluorescence microscopy
- + Seed for amplifiers
- + Laser ranging
- + Semiconductor inspection
- + Single photon counting

OUTSTANDING FEATURES :

- + External laser triggering
- + Continuously tunable repetition rate
- + Pulse on demand
- + Master/slave operation
- + Diffraction-limited beam quality
- + Lightweight
- + Maintenance free – no alignment required
- + 24/ 7 operation
